

# Underage Drinking in Arizona

## *The Facts*

Tragic health, social, and economic problems result from the use of alcohol by youth. Underage drinking is a causal factor in a host of serious problems, including homicide, suicide, traumatic injury, drowning, burns, violent and property crime, high risk sex, fetal alcohol syndrome, alcohol poisoning, and need for treatment for alcohol abuse and dependence.

### *Problems and Costs Associated with Underage Drinking in Arizona*

Underage drinking cost the citizens of Arizona \$1.3 billion in 2005. These costs include medical care, work loss, and pain and suffering associated with the multiple problems resulting from the use of alcohol by youth.<sup>1</sup> This translates to a cost of \$2,355 per year for each youth in the State. Arizona ranks 13<sup>th</sup> highest among the 50 states for the cost per youth of underage drinking. Excluding pain and suffering from these costs, the direct costs of underage drinking incurred through medical care and loss of work cost Arizona \$516 million each year.

**Costs of Underage Drinking  
Arizona 2005**

**Costs of Underage Drinking by Problem, Arizona 2005**

<b>Problem</b>	<b>Total Costs (in millions)</b>
Youth Violence	\$508.5
Youth Traffic Crashes	\$398.7
High-Risk Sex, Ages 14-20	\$182.4
Youth Property Crime	\$96.7
Youth Injury	\$34.8
Poisonings and Psychoses	\$10.2
FAS Among Mothers Age 15-20	\$33.4
Youth Alcohol Treatment	\$31.6
<b>Total</b>	<b>\$1,296.4</b>

Youth violence and traffic crashes attributable to alcohol use by underage youth in Arizona represent the largest costs for the State. However, a host of other problems contribute substantially to the overall cost. Among teen mothers, fetal alcohol syndrome (FAS) alone costs Arizona \$33.4 million.

Young people who begin drinking before age 15 are four times more likely to develop alcohol dependence and are two and a half times more

likely to become abusers of alcohol than those who begin drinking at age 21.<sup>2</sup> In 2004, 902 youth 12 - 20 years old were admitted for alcohol treatment in Arizona, accounting for 12% of all treatment admissions for alcohol abuse in the State.<sup>3</sup>

## *Alcohol Consumption by Youth in Arizona*

Underage drinking is widespread in Arizona. Approximately 273,000 underage youth in Arizona drink each year. In 2005, according to self-reports by Arizona students:<sup>4</sup>

- 79% had at least one drink of alcohol on one or more days during their life.
- 27% had their first drink of alcohol, other than a few sips, before age 13.
- 47% had at least one drink of alcohol on one or more occasion in the past 30 days.
- 31% had five or more drinks of alcohol in a row (i.e. binge drinking) in the past 30 days.
- 8% had at least one drink of alcohol on school property on one or more of the past 30 days

In 2005, underage drinkers consumed 17.3% of all alcohol sold in Arizona, totaling \$443 million in sales. These sales provided profits of \$214 million to the alcohol industry.<sup>1</sup>
